

I agree with EVERY aspect of the FISTS CW Club Petition, RM-10811.

While it is important to retain CW testing, it is equally important to reemphasize the technical aspects of the Amateur Radio Service and to improve our testing procedures. The FISTS petition is the only proposal currently before the Commission that addresses all of these critical issues.

Every single recommendation in the FISTS petition hits the mark. I urge the Commission to adopt every recommendation in the FISTS petition.

Thank you,

Alan J. Wormser, N5LF
